ARCHITECTURAL PLAN PROCESS

An architectural plan is a design and planning for a building and can contain architectural drawings, specifications of the design, calculation, time planning of the building process, and other documentation.

With the roof plan and elevations, we produce the roof report providing you the accurate and detailed information.
AERIAL VIEW PROCESS

Aerial view or bird-eye view is an elevated object from above, with a perspective as though the observer were a bird, often used in the making of blueprints and maps.

The information we need is the address or coordinates Lat/Long in order to process your report.
